MAKE YOUR SPACE MORE

LONG SPAN RACK

Adjustable Long Span Rack is probably the most widely used type to match the lift height of various material handling equipments. It consists of upright end frames and pairs of horizontal beams on which the pallets are located, and beam heights are adjustable to suit the height of the pallet loads being stored. APR is a flexible, versatile storage system, which gives excellent stock access. Above racks are used for storing heavy materials available in high rise and length upto 10 ft can accommodate various type of goods, it can also be used with the forklift to lift the materials upto maximum height these are also easy installable and has the system to shift any one place to another, heavy duty racks are a worldwide new concept.

SUPERMARKET RACK

Supermarket Wall gondola units are available as standard modular units and can be customized according to the merchandiser's choice.

CENTER / WALL GONDOLA

Wall gondola units can be popularly seen in a lot of retail environments like convenient stores, auto part dealer showrooms, sporting goods shops, pet stores, pharmacies apart from the all popular supermarkets.

SLOTTED ANGLE RACK

PIGEON HOLE RACK

We offer high quality pigeon hole units, ideal racking system for schools and institutions....

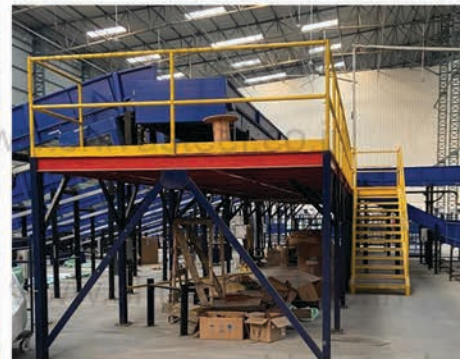

The units can easily fit easily into the modern day office and institutions. They can be mounted onto walls or can be floor standing.

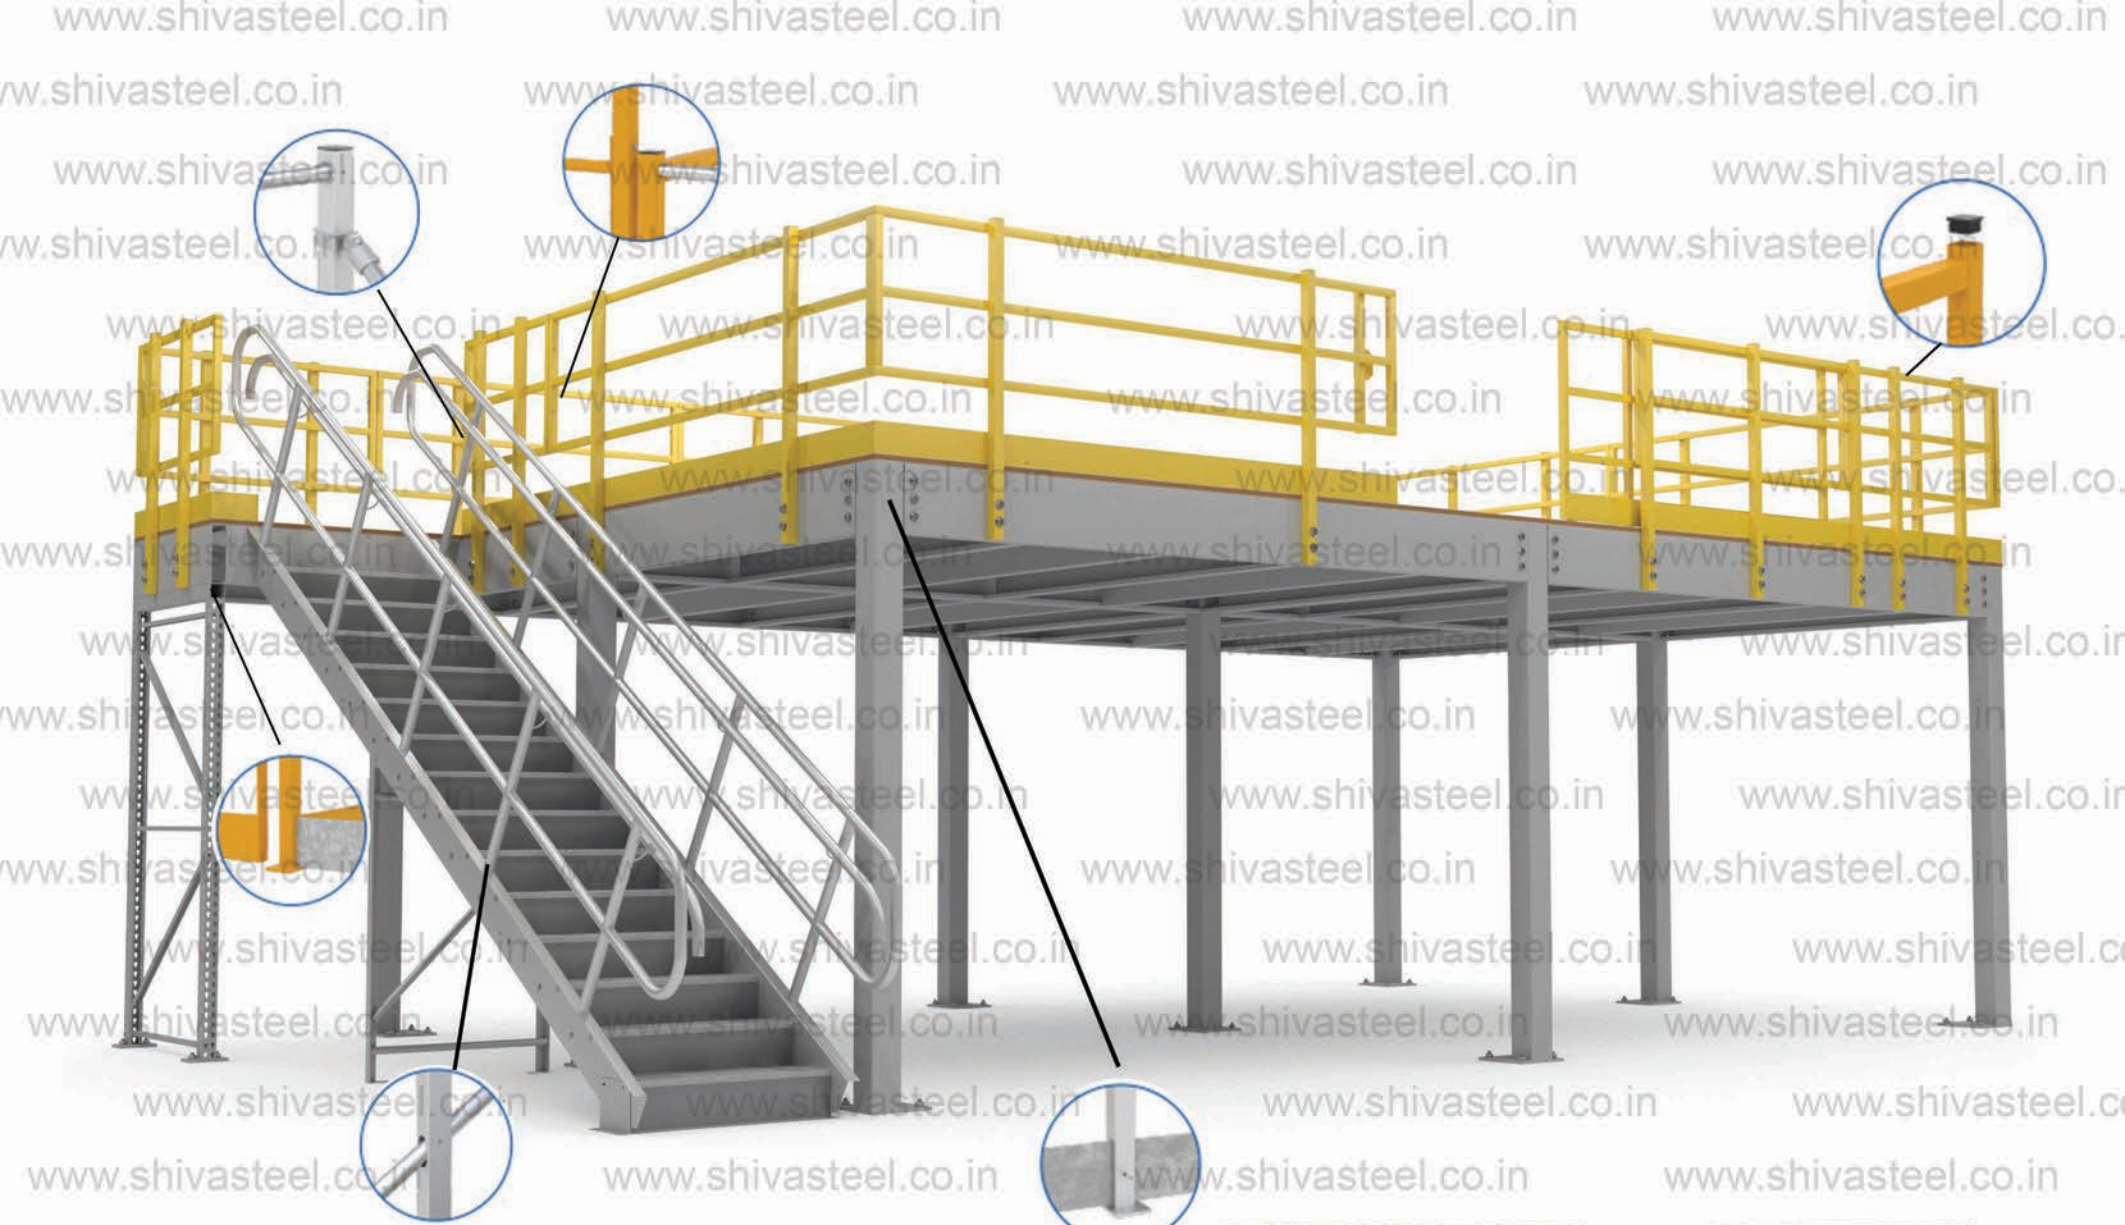

MEZZANINE FLOOR

Empty space in your premises can be turned into a useable asset, consider areas above machinery or above existing offices, all of these areas can be filled with a platform which will maximise the space available.

Mezzanine floor structures are made out of slotted angles and accessories to use the big height space into double for the economic purpose which can be made with bolt nuts without damaging any floor or wall and also can be dismantled easily for one place to another. We are profesional in making mezzanine floor like other stucture

A Mezzanine floor is essentially a raised platform that is supported by steel columns and is totally independent of the host building. It allows you to create additional floor space from wasted air space above existing work and storage areas and can be used to create extra office, storage, production and retail space. Any other extra level of storage can be added to the existing framework of the floor. Mezzanine floors are easy to install, have simple nut and bolt assembly, and can also be easily expanded, modified or moved, as per the requirements of our clients.

PERFORATED CABLE TRAY & ELECTRICAL RACEWAY

Perforated cable tray is a kind of cable tray with holes on bottom sheet and side rails for laying power and signal cables for the purpose of distributing electricity, signaling in industrial plants, department stores, gyms, hospitals, airports and other industries.

Cable Tray: Powder Coating, Pre-Galvanized & Hot Dip Galvanized Coating. Tray Type: Perforated Cable Tray. Material: GI. Finishes: MS, Thicknesses: 1.00mm, 1.20mm, 1.50mm, 2.00mm, to 2.5 mm.
